DETAILED ACTION

PETITION TO ACCEPT COLOR DRAWINGS UNDER 37 C.F.R. § 1.84(A)(2)

Applicant's petition under 37 CFR 1.84(A)(2) filed 07/18/2003 is ACCEPTED because the proper petition or processing fee of \$130.00 required under 37 CFR 1.17 has been submitted.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to microparticles, classified in class 424, subclass 489.
- II. Claims 15-19, drawn to a controlled release formulation, classified in class 424, subclass 501.
- III. Claims 20-28, drawn to a method of preparing a sustained release formulation, classified in class 424, subclass 78.33.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case invention II is drawn to a controlled release formulation which is not required in invention I, the process of using the microparticles is not disclosed in invention I although the microparticles could be

Art Unit: 1618

used in any number of consumer products besides controlled release formulations such as immediate release dosage forms or used in topical compositions for instance.

Inventions I and II are related to invention III as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the microparticles could be made by any number of other processes not encompassed in invention III such as wet or dry granulation, and forming particulates using super critical fluid techniques such as gas anti-solvent GAS.

Species Election

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) The various carbamates in claims 6,8,9,17,21 and 24 2) The various times for the sustained release in claims 17 and 18 (48 hours or one week).

Applicant is required under 35 U.S.C. 121 to elect a **single disclosed species** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 6,8,9,17,18,21 and 24 are generic. **Note:** the elected species will name a specific carbamate and specific time that the sustained release releases the active.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1618

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
